GGI International launches new corporate image

Montreal, Canada, June 29th, 2007 — GGI International is a Global leader in the custom design and manufacturing of User Interface Assemblies and solutions for OEMs in numerous industries, including Medical, Military, Aerospace, Point-of-Sale, Telecom, Industrial Controls, Transportation and specialized Automotive.

From its new world class, state-of-the-art facility, located 5 minutes from the Pierre Elliot Trudeau International Airport in Montreal , Canada, where it practices Lean manufacturing techniques at every level of company operations, GGI proudly designs, builds and ships its products throughout the world.

Due to new product and technological developments, GGI is updating its corporate image in order to better reflect its position as a market leader of custom designed User Interface Assemblies across North America, Europe and in the global marketplace. In order to further communicate to its customers and to the marketplace, the depth and scope of the products and services offered, GGI International is launching a new corporate image.

GGI's new corporate image includes a new logo, website and company brochure conveying GGI's wide breadth of product offering, innovation capabilities and technological superiority.

Be sure to visit our website at www.ggi-international.com and see first hand what GGI has to offer.

GGI is RoHS and ESD 20.20 compliant as well as ISO 9001:2000, controlled goods (CGP) and C-TPAT certified.

About GGI
