## MOVING IN A NEW DIRECTION: GGI'S RECENT MOVE TO A NEW PLANT IMPROVES CUSTOMER SERVICE AND PRODUCTION TIMES

**Montreal, Quebec. (November, 2005)** – GGI International is pleased to announce that its two facilities (administration and manufacturing) are today under one roof. GGI's new world class, state-of-the-art manufacturing facility located in Montreal, is only 5 minutes from the Pierre-Elliott Trudeau International Airport.

Equipped with 100K certified clean rooms for screenprinting and optical assembly, GGI is dedicated to providing its customers with superior quality products. This long awaited move is an essential part of GGI's growth and will significantly improve customer service and production cycle times.

### Implementing a Lean Manufacturing Process

GGI has also implemented a lean manufacturing process in order to increase production efficiency, improve customer satisfaction and enhance the value-added products and services offered.

Advantages of GGI's lean manufacturing process:

- Increase in manufacturing flexibility
- Increase in employee productivity
- Increase in customer satisfaction
- Reduction in lead times

###

### About GGI

GGI is a privately owned company specializing in the design and manufacture of customized interface assemblies, membrane switches and graphic overlays. GGI is ISO 9001:2000 certified, a member of the [American Society for Testing and Materials](#) (ASTM), the [Specialty Graphic Imaging Association](#) (SGIA) and the [Digital Printing and Imaging Association](#) (DPI). The exclusive Canadian licensee agreement with Duraswitch® technologies, allows GGI to manufacture, market and distribute innovative switch technologies such as PushGate®, thiNcoder® and MagnaMouse™, to the world market.
